

TECHNICAL DATA SHEET - CLEANING AND PREPARATION FINAL CLEANER

Cleaning agent for substrates such as car bodies, metal, plastic, paints, glass, Plexiglas... Eliminates traces of grease, adhesive... Dries quickly and does not leave any traces on the substrate. Intended for the final cleaning of car bodies during the preparation process of a full vehicle wrap.

COMPOSITION:

- Water-based.
- Contains isopropyl alcohol.
- Without surfactants.

LIQUID FEATURES:

- Green liquid.

USER'S INSTRUCTIONS:

- This liquid enables a final cleaning and degreasing right before the film's application. In particular, it eliminates traces and residues of previously-used more powerful cleaners (such as ADHESIVE REMOVER).
- Spray it onto the dirty surface, wait between 30 and 60 seconds according to the degree of soiling.
- Wipe it dry with a clean and dry microfibre cloth.

Caution: *This cloth should exclusively be used for cleaning purposes with the FINAL CLEANER.*

- In the case of stubborn soiling, this cleaning operation must be repeated.
- In the case of adhesive, wax or nano-varnish residues, first apply the ADHESIVE REMOVER.

STORAGE:

- Keep the original container tightly closed, in a properly ventilated area. Keep it away from flames or sparks. Do not smoke.

The safety data sheet is available upon request.

- Shelf life: 1 year when stored in its unopened original container.

NOTES:

Due to the great variety of substrates and the growing number of new applications, the installer must check the suitability of the medium for each application. All the published information is based on measurements regularly performed in the laboratory. It does not however constitute a binding guarantee. The seller cannot be held liable for indirectly related damages and assumes no liability for claims that are higher than the replacement value of the purchased product. All specifications are subject to potential changes without prior notice. Our specifications are automatically updated on our website www.hexis-graphics.com.
