

**PRODUCT 100 % COMPATIBLE  
WITH HEXIS FLEX FILMS**

# REMOVFLEX

The AlbaChem® Vinyl Letter Removing (VLR) Solvent is specially formulated to completely remove hot-melt adhesive flex films and residues from most fabrics, in a few seconds and without leaving any traces.

## ADVICE FOR USE

- Shake the bottle well before use.
- Turn the garment inside out and apply the solvent directly to the fabric, to the area of the flex film's hot-melt adhesive.
- Slightly stretch the fabric around the flex film to be removed in order to enable it to peel off.
- Remove the flex film from the edges by slightly scraping it.
- Remove any adhesive residues remaining on the outer side of the garment by wiping it with a clean white cloth soaked with the VLR solvent.
- Repeat the operation if necessary.

## PRECAUTION FOR USE

- Do not use the liquid on acrylic fabrics.
- Use it in a properly ventilated area.
- Refer to the safety data sheet available upon request.
- It is recommended to wear protective gloves.
- Wash your hands after handling.
- Keep out of reach of children.

## COMPOSITION

Contains: Methyl Acetate (Cas 79-20-9) and 1,3 dioxolane (cas 646-06-0).  
It does not contain any chlorinated solvents.

## FEATURES

Appearance: Liquid  
Colour: Colourless  
Odour: Solvent

## STORAGE

Keep the films away from sunlight, heat and any source of ignition.

**NOTES:**  
Prior to any use of the product, it is the responsibility of the user to verify the compatibility of the product with the surface to be treated.
