

# THE190EVO

Method

HEXGSM001

Method

**HEXNFX41021** 

Method

HEXNFX41021

Method

HEXRET001

Method

HEXOPA001

## **PRODUCT DESCRIPTION:**

Printable film composed of a 50-µm cast PVC, which is coated with a pressure-sensitive acrylic adhesive. Micro-structured adhesive for faster application and air evacuation. For solvent, eco-solvent, latex and UV inkjet printing. Glossy surface finish.

(Indicative value)

**50 μm (2 mil)** (Indicative value)

235 µm (Average values)

 $240 \text{ g/m}^2$ 

(Average values)

min. 15 N/25 mm

(Average values)

min. 70 %

(Average values)

< 0.3 mm

(Average values)

> 99,5 %

## FILM FEATURES:

• Thickness
• Total thickness
• Total weight
• Tensile strength
• Elongation at break
• Shrinkage 168 hours at 70 °C (158 °F)
• Opacity

#### LINER:

- Silicone-coated and embossed PE paper 160 g/m<sup>2</sup>.
- Stable under hygrometric variations

#### **ADHESIVE PROPERTIES:**

(Measured average values at publication of the technical data sheet)

$\cdot$ Peel strength test at 180°; Measurement support glass			
	(Average values)	Method	
after 20 minutes of application	10 N/25 mm	HEXFTM001	
	(Average values)	Method	
after 24 hours of application	12 N/25 mm	HEXFTM001	
	(Average values)	Method	
• Initial tack	5 N/25 mm	HEXFTM009	
• Release	(Average values) 0.2 N/25 mm	Method HEXFTM003	

• The adhesive is resistant to most chemicals (alcohol, diluted acids, oils).

#### ADHESIVE:

- · Solvent-based acrylic adhesive.
- Structured adhesive for faster application and air evacuation.
- · Immediate and permanent adhesion, optimal after 24 hours of contact.

#### **PRINTING GUIDE:**

- $\cdot$  Touch-dry after less than 10 minutes depending on printer used.
- Optimal drying time for the inks before laminating or further processing is 48 hours minimum.

## **USER'S INSTRUCTIONS:**

Dry application method

It is mandatory to use the so-called «dry» application method with this film, due to its TAKE HEAT EASY liner. This technology means you can very easily reposition the film on the substrate during application, while not excluding the squeegeeing step for optimal adhesion of the film to the substrate.

- Recommended minimum application temperature: +10 °C (+50 °F)
- Operating temperature range: -40 °C to +90 °C (-40 °F to +194 °F)
  - Conformable product, particularly suitable for vehicles.
  - Adhesion to glass, steel, aluminium, PVC, melamine, etc. except grain substrates or substrates coated with acrylic paint.
  - In the case of an already painted substrate, self-adhesive media must only be applied to undamaged original paintwork. If the paintwork is not original and/or damaged, the application and the removal are at the judgement and risk of the installer.

# **OPERATING RECOMMENDATIONS:**

- The surface finish of your printing may be modified/improved/protected by applying the PC190 laminate. Other laminates are also compatible (PC500, structured laminates, etc.).
- For more information on the application method of the THE190EVO film, please refer to its Application Guide available under the «Professionals» heading, in the «Digital printing media" category on our website www.hexis-graphics.com.

#### STORAGE:

1 year

Storage period before use

Storage temperature +15 °C to +25 °C (+59 °F to +77 °F)

### **DURABILITY:** (Central European climate)

Printed: 2 years.

Relative humidity during storage with relative humidity between 30 % and 70 %

Storage method before use in its unopened original packaging

To find the indicative durabilities of the films for any other exposure and geographical area, please refer to the «Conversion rules for indicative durabilities according to geographical area» chart available under Durability, on the «Professionals» pages on our site www.hexis-graphics.com.

#### NOTES:

Due to the great variety of substrates and the growing number of new applications, the installer must check the suitability of the medium for each application. The measuring methods for the standards quoted above served as the basis for the development of our own measuring methods, which are available on request. Please feel free to contact us to get the latest instructions in use. All of the published information is based on measurements regularly performed in the laboratory. The published information does not however constitute a binding guarantee. The seller cannot be held liable for indirectly related damages and assumes no liability for claims that are higher than the replacement value of the purchased product. All specifications are subject to potential changes without prior notice. Our specifications are automatically updated on our website www.hexis-graphics.com.
